script.js

```javascript
1   document.getElementById('contactForm').addEventListener('submit', function (e) {
2       e.preventDefault();
3
4       const name = document.getElementById('name');
5       const email = document.getElementById('email');
6       const errorMsg = document.getElementById('error');
7
8       // Simple Email Validation
9       const emailPattern = /^[^\s@]+@[^\s@]+\.[^\s@]+$/;
10
11      if (name.value.trim() === '' || email.value.trim() === '') {
12        errorMsg.textContent = 'Please fill in all required fields.';
13        return;
14      }
15
16      if (!emailPattern.test(email.value)) {
17        errorMsg.textContent = 'Please enter a valid email address.';
18        return;
19      }
20
21      errorMsg.textContent = '';
22      alert('Form submitted successfully!');
23      this.reset(); // Clear form
24    });
25
```
